

# JAMILAH MARRAM DUARTE

## Software & AI Developer | GoHighLevel Automation Specialist

Tagum City, Davao del Norte, Philippines | [jamilahmarram@gmail.com](mailto:jamilahmarram@gmail.com) | [jamilahmarram.com](http://jamilahmarram.com)  
| [github.com/JamDev15](https://github.com/JamDev15)

### SUMMARY

Software and AI developer with a Computer Engineering degree and hands-on experience building full-stack web and mobile apps, AI chatbots, RAG systems, and machine learning tools, plus GoHighLevel CRM pipelines, funnels, and workflows for US-based businesses. Strong in Python, React, and API integrations, so I can build the custom software, the AI, and the automation around it. Focused on practical systems that help businesses capture leads, serve customers, and run operations with less manual work.

### CORE SKILLS

|                             |                                                                                                                                                                                       |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>AI Development</b>       | AI chatbots and voice agents (text-to-voice), RAG pipelines, LangChain, Pinecone vector search, OpenAI and LLM APIs, NLP, sentiment analysis, TensorFlow, Keras, AI knowledge bases   |
| <b>Software Development</b> | Python, JavaScript, Java, React, React Native, MongoDB, REST API integrations, full-stack web and mobile apps, admin dashboards, authentication / login flows, Vercel, Render, GitHub |
| <b>CRM &amp; Automation</b> | GoHighLevel (pipelines, workflows, funnels, forms, sub-accounts, email/SMS), HubSpot CRM, form consent and lead attribution troubleshooting                                           |
| <b>Web &amp; E-commerce</b> | Shopify (Liquid, theme customization, checkout), WordPress / Elementor, CheckoutChamp                                                                                                 |
| <b>SEO &amp; Marketing</b>  | Technical SEO audits, AEO, Google Search Console, B2B content optimization, Canva                                                                                                     |

### SOFTWARE & AI DEVELOPMENT HIGHLIGHTS

- **AI chatbots in production:** built dual AI chatbots with text-to-voice responses for [app.thefinders.org](https://app.thefinders.org) and [yoursurvivalexpert.ai](https://yoursurvivalexpert.ai), plus a website chatbot for Halo Private Label.

- **Machine learning:** developed an AI Doctor chatbot with Python, TensorFlow, and Keras, integrated into a responsive React web app with cloud deployment.
- **LLM applications:** built OpenAI-powered trading bots, sentiment analysis tools, and AI-generated media platforms in Python.
- **Full-stack products:** shipped web and mobile apps (Python, React, React Native, MongoDB) with course management, admin dashboards, login flows, and donation pages.
- **Internal business tools:** built project-management apps for wrap and signage jobs (Ikonic) and for manufacturer data and artwork proofs (Halo).

## PROFESSIONAL EXPERIENCE

---

### GoHighLevel & Software Developer — Ikonic

2026 – Present

*Denver, CO (remote)*

- Manage GoHighLevel CRM pipelines, lead follow-ups, workflows, forms, and client sub-accounts for signage and marketing clients.
- Audited client automations to find inactive nurture sequences and confirm reactivation workflows were running.
- Restored 20 lost client opportunities from tracking records and updated 29 answers across client AI knowledge bases.
- Troubleshoot form consent, lead attribution, email authentication, and client usage billing issues.
- Built an internal application for managing wrap and signage projects; supported service pages, signup flows, and lead capture tools.

### Software Dev & SEO / AEO Specialist — Halo Private Label

2025

*halohydration.com (remote)*

- Built and maintained WordPress / Elementor pages, improving content, usability, and search visibility.
- Developed an AI chatbot for the website to answer visitor questions and support inquiries.
- Built an internal application for managing manufacturer information and reviewing artwork proofs.
- Audited indexing, broken URLs, redirects, and inconsistent product information; tracked performance in Google Search Console.
- Managed HubSpot CRM contact records and supported lead tracking.

## GoHighLevel & Shopify Specialist — Nell Tax IT LLC

2024 – 2025

- Designed and built Shopify stores for clothing brands, including product setup, theme customization, and checkout optimization.
- Built GoHighLevel marketing funnels and business websites for clients including Nell Tax and CareStaff.
- Managed social media content to support brand visibility and lead generation.

## Software & AI Developer — FWF LLC

2023 – 2025

- Built full-stack web and mobile applications with a team using Python (backend), React (frontend), and MongoDB.
- Implemented course management systems, admin dashboards, login flows, donation pages, and email campaigns.
- Integrated dual AI chatbots with text-to-voice responses (e.g. app.thefinders.org, yoursurvivalexpert.ai).

## Freelance Software, AI & Web Developer

2022 – 2024

*Contract and project-based work*

- **Tractive World:** Built AI-driven applications using OpenAI NLP models and Python, including trading bots, sentiment analysis tools, AI-generated media platforms, and a WordPress e-commerce site for a gym product.
- **Apeiron LLC:** Developed an AI Doctor chatbot (Python, TensorFlow, Keras) for real-time user inquiries, integrated into a responsive React web app with API and database integration and cloud deployment.
- **Uptown Printing:** Set up GoHighLevel and FlowTrack systems for lead and job tracking.
- **Sicuro Brand LLC & HalalGrowth:** Built and maintained client websites and web features.
